# 01. Introductions

## 1.0. About Project PSRS

Project PSRS is based on TRC20 has some great features secure, useful product based on Tron Blockchain, it will include easy cryptocurrency payments integration and even a digital arbitration system .

The issues of slow block confirmations and high gas fees need to be solved before we target mass adoption by mainstream users. And most importantly, it needs awesome user experience.

## 1.1. Overview of Cryptocurrency

Cryptocurrency is an internet-based medium of exchange which uses cryptographical functions to conduct financial transactions.

Cryptocurrencies leverage blockchain technology to gain decentralization, transparency, and immutability. The most important feature of cryptocurrencies is that it is not controlled by anybody, therefore blockchain has brought a system that's immune to the old one controlled by the governments.

# 02. Structure and System

## 2.0. Blockchain Overview

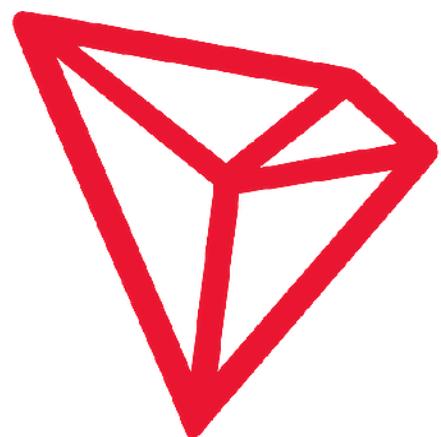

Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system.

A blockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the blockchain. Each block in the chain contains a number of transactions, and every time a new transaction occurs on the blockchain, a record of that transaction is added to every participant's ledger. The decentralised database managed by multiple participants is known as Distributed Ledger Technology (DLT).

## 2.1. Overview of TRC20

TRC20 (TRC20 Token Standard) is a token standard based on the implementation of smart contract when using TRON network to issue a token.

In order to swap, transfer, share token and be supported by digital wallets, all the TRC20 token follow a series of specifications which include 6 required items and 3 optional items.

## 2.2. Overview of PSRS Token

PSRS is currently on the TRC20 Blockchain this is to enhance better transactions with less or no gas fee. We aim to change that by simplifying the interaction between users and the decentralized world.

We want to make interacting with the decentralized ecosystem so easy that anyone can do so without worrying about the complexity of the system.

### PSRS Token Review

<b>Name</b>	: PSRS
<b>Symbol</b>	: PSRS
<b>Decimals</b>	: 8
<b>Blockchain Type</b>	: TRC20
<b>Total Supply</b>	: 10.000.000 PSRS

# 03. Project PSRS Future & Exchange

## 3.0. PSRS Future

Build a Secure, Useful, and Easy-to-Use Product based on private blockchain. It will include easy cryptocurrency payments integration, and even a digital arbitration system. At the end, our aims to integrate all companies, employees, and business assets into a unified blockchain ecosystem, which will make business truly Efficient, Transparent, and Reliable.

### 3.1. PSRS Target Listing and Exchange

After discuss about listing and exchange with PSRS Team, so far only those listed below will be candidates for the Exchange and Listing for the PSRS Token.
